Members of COAMB
(unemployed) 80 €

Members of COAMB 110 €

Other 150 €

10 hours of training

5 on-site lessons

Schedule: 19 - 21 h

This course can be subsidized through Fundae: companies who enroll an employee in the course can get back the cost of the course. More information in [this link](#).

Have you ever undertaken a job interview in English? How do you feel when you have to make a presentation to an audience? Does a written report take you ages to complete when you have to write it in English? If you use English for work, but you are struggling with it, this course can help you!

Contents overview

- Networking. Key environmental world topics
- Key grammar points and common errors
- Working in English (vocabulary, translations, writing)
- Employment (role playing, resources)
- European projects and international opportunities
- Meetings, debates and agreements
- Oral presentation of every student

Who's this training for?

Professionals in the science and environment fields who require the use of English in their everyday professional tasks, as well as Environmental professionals with international expectations.

Requirements

A minimum knowledge of the English language (level B.1.) is required to participate in the course.

To prove eligibility for your participation, please take the test [here](#) and send the result to escola.formacio@coamb.cat when you complete your registration.

This practical 10 hours course aims to improve your skills in English oriented to your everyday professional activity as environmentalists (oral presentations, European Projects, international relations and meetings, career opportunities...).

The course will take place during five weeks, with one on-site lesson per week.

The lessons will be performed in English and require your active participation.

When you finish the course, you'll feel more confident in your use of English for professional purposes.
